

## ENVIRONMENTAL MANAGEMENT SYSTEM POLICY

The East End Landfill (TEEL) and Darbytown Road Landfill (DRL) doing business as the East End Resource Recovery conduct their businesses according to the TEEL/DRL Environmental Management System (EMS). Therefore, all employees, contractors, service providers, suppliers, and visitors are requested to read and conduct relevant activities consistent with our environmental management system and our environmental policy.

TEEL/DRL is committed to minimizing our impacts on the environment by providing the highest quality construction and demolition debris management, resource recovery, and disposal services by:

- Complying with applicable environmental laws, regulations, and TEEL/DRL policies,

- Practicing prevention of pollution by identifying, preventing or minimizing pollution in all areas associated with our operations, where feasible, through training, education, and communications within TEEL/DRL and with our community,

- Implementing our environmental management system and demonstrate commitment to our environmental policy through our programs for setting and reviewing environmental goals, objectives and targets,

- Continually work to improve the performance of our environmental management system.

This policy will be conveyed to all TEEL/DRL employees, consultants, contractors, and visitors and will be available to the public upon request.
